

## Machine Learning Essentials - 1 day Bootcamp

### Pre-Requisites:

- General IT Knowledge
- General Mathematical Background

### Audience:

- CxOs, Solution Architects, Business Leaders, Project Managers
- Entrepreneurs, Strategy Leaders
- Developers

### Pricing

- Bootcamp Fee: US\$ 600 (Per person)
- Early bird Discount 20%
- Limited Seats (16 only)
- Time 9:00 am to 5:00pm
- Onsite or Remote

### Course Content:

There is industry wide demand of intellectuals who are familiar with Machine Learning and can do data modeling and train the data to be used in a ML algorithm. This bootcamp is designed for any one who is aware of importance and benefits of Machine Learning but does not know where to take the start. This course will take you from 0 to 8 in the Machine Learning area. You will learn theoretical principles, algorithms and applications of Machine Learning. The course will use Python as the programming language and will have hands on Labs as well to give you the practical exposure to get on the track of Machine Learning.

## AGENDA

- |   |  |
|---|--|
| <input checked="" type="checkbox"/> What is Machine Learning and Artificial Intelligence? | <input checked="" type="checkbox"/> Un supervised Learning |
| <input checked="" type="checkbox"/> Various techniques used in Machine Learning           | <input checked="" type="checkbox"/> Deep Learning          |
| <input checked="" type="checkbox"/> Data Training   | <input checked="" type="checkbox"/> Lab                    |
| <input checked="" type="checkbox"/> Regression  | <input checked="" type="checkbox"/> Real Use Cases         |
| <input checked="" type="checkbox"/> Classification  |  |
